Data Created for Public/Scholarly Distribution

1. National Officer-Involved Homicides Database (NOIHD) – A law-enforcement-wide database combining information on homicides resulting from all police actions (prior to booking) merged with crosswalks to law-enforcement agency- , demographic- , crime- , emergency department- , and gun-data. The database is aggregated at the level of law-enforcement agencies with annual measurement (2000-2017; n=641,821) suited for analysis of extant policy and/or policy changes that may be related to police-involved homicides in the United States. I am one of the core faculty/scholars involved in creating and maintaining the database, alongside Finch, B. (PI, USC), Burghart, D. B., Johnson, R., Klinger, D., & Thomas, K. Data cataloged at: <https://www.icpsr.umich.edu/web/ICPSR/studies/38315>
